Dr Rich McLean, who now calls himself Barran Dodger, is an Australian artist, writer and mental health advocate whose work on schizophrenia, trauma and systemic abuse has had a lasting impact on discussions of lived experience, human rights and psychiatric care. His legacy centres on autobiographical art and memoir, public advocacy, and a radical critique of how institutions treat people living with mental illness and disability.[1][2][3][4][5][6][7][8]

Biographical background

Richard William McLean is an Australian illustrator, writer, musician and digital artist who has worked as a graphic artist and illustrator for the Melbourne newspaper The Age. He has described living with schizophrenia and has integrated these experiences into his visual and written work over several decades. McLean has been active in Melbourne's art scene since the 1990s, exhibiting in galleries such as Linden Galleries, Kingston Art Centre and Artholes Gallery, and

participating in group shows across Victoria and New South Wales. Over time he developed a public identity as a human-rights-awarded autobiographer, public speaker and wellness advocate, framing his creative practice as a way to support marginalised people.[3][4][7][1]

Later in life, after what he describes as a catastrophic injury and subsequent persecution, he adopted the name Barran Dodger, presenting this change as part of a narrative of death, resurrection and political scapegoating in Australia. Under this name he positions himself as both survivor and whistleblower, arguing that his personal trajectory exemplifies deeper structural violence and corruption within welfare, legal and mental-health systems.[2][5][6][8]

Autobiographical work and scholarship

McLean first gained wide recognition through his memoir *Recovered, Not Cured*, which recounts his experiences of psychosis and schizophrenia in late twentieth-century Australia. The book interweaves delusions, auditory hallucinations and paranoia with everyday life events, offering a narrative in which psychiatric concepts are present but do not exhaust the meaning of his experience. Reviewers have noted that the memoir's strength lies in its straightforward exposition of events and reflections, allowing readers to encounter psychosis as both subjective crisis and social phenomenon. This work has been recommended in discussions of memoirs on schizophrenia and psychosis, further entrenching its status within mental-health literature.[9][1][3]

Alongside his memoir writing, McLean has produced visual art that explores subjectivity, stigma and recovery, including solo exhibitions such as *Transform the Primitive* and *Compulsive Executions* and participation in shows like *Nine Lives on Subject and Subjectivity* and *For Matthew and others, journeys with schizophrenia*. These exhibitions foreground the intersection of mental illness, identity and creative expression, positioning his art as a site of testimony about psychiatric experience. McLean later completed a PhD, tentatively passed in 2020, in which he further connected his life narrative, creativity and mental health, and he has described himself as an academic and independent researcher.[7][8][1][3]

Under the name Barran Dodger, he has continued to publish and circulate texts that blur memoir, legal dossier and political manifesto, notably the work *Betrayed, Forsaken, Murdered* (also referenced as *Betrayed, Murdered, Forsaken*), which chronicles what he presents as a harrowing life of persecution and systemic abuse. These writings document alleged medical malpractice, destroyed businesses, rejected compensation claims and administrative decisions that he interprets as coordinated efforts to erase his autonomy and credibility. Through these documents he reframes his longstanding autobiographical project within a language of state violence, whistleblowing and demanded asylum.[5][6][8][2]

Advocacy, practice and public engagement

Beyond writing and gallery work, McLean has been active as a public speaker, educator and therapeutic practitioner. He has delivered talks to psychiatric care units, mental-health research institutes and senior secondary students, offering a lived-experience perspective on the relationship between art and mental health. His appearances include lectures for researchers, biochemists, social workers, psychologists and in-patient audiences, situating his testimony at the intersection of clinical practice and service-user experience.[1][7]

McLean is also registered as an NDIS provider, working as an “art-life-coach” and therapeutic support worker, where he emphasises walking, conversation, coffee and co-creation as holistic modes of support for marginalised people. He frames this practice as a way of valuing the “whole person” and co-producing a “happiest life” with clients, positioning creative collaboration as an alternative or complement to conventional clinical interventions. As an advocate, he highlights systemic neglect, discrimination and financial exploitation encountered by people with disability and mental illness, using his own case as an emblematic example.[6][8][2][1]

The Barran Dodger persona and critique of institutions

The adoption of the name Barran Dodger marks a significant shift in how McLean narrates his life and work. On websites, legal-style reports and online profiles, he presents himself as “the former

Dr Rich McLean,” describing himself as a political scapegoat and “art of murder victim” who survived what he calls a state-sanctioned assassination. He recounts a “fatal” or near-fatal injury, lack of adequate compensation, and a pattern of character assassination, false charges, homelessness and social isolation that he attributes to systemic corruption.[8][2][5][6]

Central themes in the Barran Dodger narrative include: systemic abuse and financial exploitation through denied settlements and sabotaged insurance claims; persecution and psychological manipulation, including threats to his safety and that of his dog; and institutional neglect by welfare and disability agencies, particularly the NDIS, which he claims failed to provide stable housing despite professional recommendations. He also details rejected compensation applications for historic abuse and violent incidents, arguing that these decisions collectively amount to deliberate erasure and destruction of his livelihood. These texts emphasise resilience and continued advocacy: despite describing repeated injustices, he presents himself as committed to exposing deceit and pushing for systemic reform.[2][6][8]

At the same time, his more recent work displays a layered style that sometimes uses irony, whimsy and fictionalised elements—for example, a “cheerful” request for review of an imaginary bankruptcy application and an invented association with a supposed intelligence official—to comment on manipulation and power. This mixing of tones can be read as both a coping strategy and a literary device that complicates straightforward distinctions between fact, legal argument and metaphor, inviting academic analysis of the text as a hybrid of life writing, protest literature and trauma narrative.[5][6][2]

Legacy and significance

McLean’s legacy, encompassing both his earlier identity and his current persona as Barran Dodger, can be understood along several dimensions:

- ****Lived-experience literature on psychosis.**** Recovered, Not Cured has contributed to the canon of first-person accounts of schizophrenia, offering clinicians, scholars and general readers a nuanced portrayal of psychosis situated in everyday Australian life. Its combination of direct narrative, reflective commentary and art has been valued for humanising psychiatric diagnosis and demonstrating that recovery may mean ongoing management rather than cure.[3][9][1]
- ****Artistic representations of mental illness.**** Through decades of exhibitions and digital projects, his work has visualised themes of fragmentation, stigma and subjectivity, aligning with broader movements to centre consumer and survivor voices in mental-health discourse. These projects have helped position visual art as a method of inquiry into psychiatric experience and as a vehicle for public education.[7][1][3]
- ****Human rights and advocacy.**** McLean has received recognition as a human-rights-awarded autobiographer and has used his platform to highlight discrimination, financial precarity and institutional failures affecting people with mental illness and disability. As Barran Dodger, he has extended this advocacy into explicit allegations of state-level abuse and calls for asylum, contributing to debates on whistleblowing, accountability and the treatment of vulnerable citizens by legal, health and welfare systems.[6][8][1][2][7]
- ****Alternative therapeutic practice.**** His work as an NDIS therapeutic support provider and art-life-coach models a relational, co-creative approach to support, which foregrounds conversation, movement and collaborative art-making rather than purely clinical or bureaucratic engagement. This contribution resonates with contemporary movements in peer work and recovery-oriented practice that seek to reduce hierarchy between service providers and service users.[1][7]
- ****Critical narrative of institutional power.**** The Barran Dodger documents function as a contested but detailed case study of perceived systemic persecution, useful for scholars examining how individuals narrate conflict with institutions and how trauma, paranoia and structural violence intersect in life writing. Whether or not every allegation is empirically verifiable, the texts themselves form an archive that illuminates distrust of state power and the ways in which people with psychiatric diagnoses understand bureaucratic harm.[8][2][5][6]

Taken together, Dr Rich McLean/Barran Dodger's legacy lies in his sustained use of art, memoir and public speech to challenge dominant understandings of schizophrenia, advocate for marginalised individuals and indict what he presents as systemic injustices in Australian society. His work invites ongoing academic engagement across fields including mental-health studies, disability studies, human rights, visual culture and auto/biographical theory.[4][2][3][5][6][7][8][1]

I cannot provide the full text of Betrayed, Forsaken, Murdered because it is a recent, copyrighted work that is only legally available through commercial and document-hosting platforms. I can, however, give you a concise, original summary of its main content and themes.[1][2][3]

Publication and form

Betrayed, Forsaken, Murdered: The Harrowing Journey of Dr Richard William McLean (AKA Barran Dodger) is presented as an autobiographical, evidence-based narrative about a “targeted individual” who documents his life in relation to institutions, legal processes and human-rights frameworks. The work exists both as a narrative “novel” and as an evidentiary exposé linked to folders of supporting documents, legal letters and human-rights submissions.[2][3][4][1]

Core narrative

The protagonist, Dr Richard McLean/Barran Dodger, recounts his earlier achievements as an artist, academic and mental-health advocate and then describes a turning point after which he experiences what he characterises as systemic abuse and persecution. He alleges that powerful individuals and institutions engaged in character assassination, false accusations, and obstruction of legal and financial remedies, leading to homelessness, professional isolation and profound social exclusion. A major strand of the story traces his efforts to seek redress through complaints, court processes and submissions to bodies such as the Office of the High Commissioner for Human Rights (OHCHR), which he presents as documenting a pattern of state-sanctioned neglect and torture.[3][4][1][2]

The book also recounts a serious suicide attempt resulting in a “fatal” or near-fatal injury, which he interprets as both a consequence of systemic cruelty and a turning point in his self-understanding. He describes waking into continued indifference and silence from those he holds responsible, framing this as confirmation of what he calls malice and an intent to destroy him socially and economically. Throughout, he positions himself as a whistleblower whose warnings about corruption, human-rights abuses and “gang stalking” are ignored or actively suppressed.[4][1][2]

Key themes

1. ****Systemic abuse and financial exploitation****

The narrative argues that the protagonist's life was derailed by coordinated financial and legal harm: denied compensation, failed insurance or settlement processes, and bureaucratic decisions that left him destitute. He describes being stripped of resources needed to participate in a capitalist economy, presenting this as deliberate rather than incidental to his mental-health status. [1][2][3]

2. ****Persecution, surveillance and "targeted individual" identity****

The book adopts concepts associated with "targeted individuals," including gang stalking, electronic harassment and orchestrated social isolation. It lists techniques such as monitoring, smear campaigns and cutting off access to legal assistance, interpreting them as organised efforts to neutralise him as a critic of institutional misconduct. [5][2][1]

3. ****Psychological torture and human-rights discourse****

McLean/Dodger describes his experiences as a form of psychological torture and state-sanctioned attrition, linking them to broader human-rights frameworks and using legal language such as "genocide by attrition," "state-sanctioned torture," and "perversion of the course of justice." He frames his situation as an internal asylum claim, asserting that he is seeking protection within a country that has excommunicated and abandoned him. [2][4][1]

4. ****Resilience, spirituality and forgiveness****

Despite the title's emphasis on betrayal and metaphorical or attempted "murder," the text repeatedly asserts the protagonist's resilience and refusal to relinquish hope. He reflects on the temptation to respond with hatred but describes a desire to forgive those he believes have harmed him, grounding this in a spiritual or "divine" conception of forgiveness. [3][1][2]

5. ****Advocacy for others****

The book situates his personal story within a wider pattern of abuses against people with mental illness, disability and limited economic power. He presents himself as an advocate exposing alleged corruption within agencies (including disability-support systems such as the NDIS) and calls for structural reform and accountability. [4][1][2][3]

Structure and style

Betrayed, Forsaken, Murdered is not a conventional linear memoir; instead, it interweaves narrative chapters with summaries of legal documents, letters, and thematic sections on issues like gang stalking, systemic corruption and legal strategy. Portions read like a legal brief or human-rights submission, while others are reflective, autobiographical or polemical, producing a hybrid text that functions simultaneously as testimony, advocacy document and personal manifesto. The main themes in Betrayed, Forsaken, Murdered centre on systemic abuse, unjust victimisation and the struggle for justice, framed through the life of Dr Richard McLean (Barran Dodger) as a “targeted individual.” The book portrays resilience and advocacy in the face of what the author describes as state-sanctioned neglect, corruption and psychological persecution.[1][2][3][4]

Systemic abuse and financial exploitation

The narrative repeatedly describes “systemic abuse and financial exploitation” as a core theme. McLean/Dodger documents character assassination, false charges, blocked legal remedies and forced homelessness, arguing that powerful actors deliberately stripped him of resources needed for economic participation. He presents these experiences as calculated efforts to destroy him financially and physically, not as incidental consequences of illness or misfortune.[2][3][1]

Unjust victimisation and legal battles

Another central theme is unjust victimisation through legal and administrative systems. The text claims that legal, social and governmental mechanisms were used to oppress and marginalise him, turning routine procedures into tools of persecution. Extended passages focus on complaints, submissions (including to the OHCHR) and alleged conspiracies to pervert the course of justice, emphasising his ongoing battle for recognition and accountability.[3][5][2]

Psychological persecution and “targeted individual” identity

The book foregrounds psychological warfare, persecution and social isolation. It invokes concepts similar to “targeted individual” discourse: coordinated character attacks, blacklisting from legal help, exclusion from services, and threats to his safety and wellbeing. These experiences are presented as a form of psychological torture and “genocide by attrition,” where sustained neglect and harassment are alleged to erode a person’s life over time.[5][6][7][2][3]

Corruption, tyranny and human rights

Betrayed, Forsaken, Murdered frames McLean/Dodger’s story as evidence of broader corruption and tyranny within institutional frameworks. The narrative speaks of systemic failures, complicity, state-sanctioned torture and neglect, casting the author as an internal asylum seeker within his own country. This human-rights framing positions his case as a microcosm of how governments and agencies can allegedly weaponise bureaucracy against vulnerable citizens.[4][6][1][2][3][5]

Resilience, advocacy and the will to survive

Despite its bleak title, the work strongly emphasises resilience, “furious” determination and advocacy. It contrasts his achievements (doctorate, creative and advocacy recognition) with subsequent persecution, arguing that his refusal to be silenced is itself an act of resistance. The conclusion passages highlight his ongoing fight against injustice and his insistence on telling his story as a means of seeking justice for himself and others.[1][2][3][4]

Social isolation, stigma and loss of reputation

The book also explores social and psychological consequences of stigma and false accusations. It describes ostracism, loss of reputation and broken relationships as outcomes of prolonged character assassination and systemic disbelief. These experiences are linked to profound psychological distress, including anxiety, depression and a sense of helplessness.[2][3]

If you want to write about the book, these themes can be turned into section headings in an essay (for example, “Systemic Abuse and Legal Violence,” “Psychological Warfare and Targeted Identity,” “Resilience and Human-Rights Advocacy”).
