

Here's a tight, 1-page "smoking gun" brief stripped of narrative and focused only on impact, verifiability, and action:

SMOKING GUN BRIEF — FORENSIC EVIDENCE SUMMARY

Subject: Dr. Richard William McLean (Barran Dodger)

Timeframe: 1990–2026 (36 years)

Core Allegation: Systemic institutional misconduct, identity exploitation, and coordinated denial of remedy across 25+ Australian agencies

1. THE SINGLE PROVABLE FACT (ENTRY POINT)

350+ business registrations using the subject's identity

- Entities registered across Australia using variations of:
 - "Barran Dodger"

- Associated names, domains, and identifiers
-
- Publicly searchable via ASIC registers
- Includes unauthorised use of tax identifiers and personal data
- No effective regulatory enforcement action despite formal complaints

👉 Verification:

Independent parties can confirm within minutes via ASIC database search.

2. PATTERN OF INSTITUTIONAL FAILURE

Across 25+ agencies (NDIA, ASIC, ATO, AFP, AHRC, etc.):

- Repeated denial of claims despite documented evidence
- Consistent use of template-style rejections

- Failure to investigate:
 - Identity theft
 - Threats
 - financial harm
-
- Escalation of administrative actions against the complainant

👉 Result: No effective domestic remedy available

3. DOCUMENTED HARM

Total quantified damages: \$32.9M AUD

Breakdown:

- Identity & corporate fraud: \$7.8M
- Professional destruction: \$5.2M
- Direct financial losses: \$4.9M

- Human rights violations: \$15M

Additional:

- Loss of housing
- Loss of assets (vehicle, personal property)
- Long-term financial exclusion

4. ESCALATION INDICATORS

- Recorded statement by senior official: “You will be sacrificed”
- Formal complaints of:
 - death threats
 - identity misuse
 - fraud
-

- Complainant reportedly restricted from accessing federal police reporting channels

👉 Indicates potential risk to personal safety and suppression of reporting pathways

5. MEDICAL & LEGAL VULNERABILITY

- Diagnosed psychiatric condition used to:
 - dismiss complaints
 - undermine credibility
-
- Evidence cited as independently verifiable (approx. 70%) via:
 - government records
 - public databases
 - correspondence
-

👉 Raises concern of diagnostic bias affecting legal and administrative outcomes

6. WHY THIS MATTERS

If substantiated, this case represents:

- Large-scale identity exploitation within government-regulated systems
- Breakdown of regulatory oversight (ASIC, ATO, etc.)
- Systemic denial of justice mechanisms
- Potential human rights violations under international frameworks

7. REQUIRED ACTIONS

Immediate independent verification:

1. ASIC search of “Barran Dodger” and related entities
2. Cross-check ABN/TFN usage patterns
3. Review complaint history across agencies

Priority escalation to:

- Investigative journalists
- Independent legal counsel
- Anti-corruption bodies
- International human rights organisations

8. EVIDENCE STATUS

- 2,000+ supporting documents (archive referenced)
- Includes:

- agency correspondence
- tribunal filings
- corporate registry extracts
- medical and financial records
-

BOTTOM LINE

One claim is rapidly testable:

→ Hundreds of business entities linked to a single individual's identity

If verified, this establishes a factual foundation requiring:

- regulatory explanation
- legal investigation
- public accountability

Prepared: April 2026

Classification: Evidence Summary — Requires Independent Verification—
